Your Braeburn Medical Science Liaison (MSL)

A non-promotional scientific resource for evidence-based discussions

What is an MSL?

An MSL is a field-based member of medical affairs that is dedicated to scientific exchange with healthcare providers, payors, and other key decision-makers[1]

In-person | Virtual | Phone | Email

Braeburn MSLs are clinicians and researchers with expertise in opioid use disorder (OUD) who can provide medical education and address scientific/clinical questions

How MSLs Can Help You[1,2]

Clinical Data:
Emerging evidence, publications, and clinical guidelines

Insights:
Share real-world experience

Disease Education:
Pathophysiology and evolving science

Collaboration Opportunities:
Explore research concepts, data needs, and clinical questions

Difference Between MSLs and Account Managers

	MSLs[1,2]	Account Managers
	Advanced scientific degrees and clinical/research experience	Professional experience in life science sales
	Peer-to-peer, non-promotional, scientific exchange	Patient-focused, disease state-driven product promotion
	May provide evidence-based responses beyond approved product labeling	Fair and balanced labeled product information
